

IISER-RSC Symposium on Functional Supramolecular Chemistry

6 March 2019 09:30-17:00, IISER Thiruvananthapuram, India

School of Chemistry of Indian Institute of Science Education and Research Thiruvananthapuram (IISER-TVM) is organizing an international conference on Supramolecular Chemistry with the partial financial support from the Royal Society of Chemistry (RSC) on 6th March 2019 at IISER Thiruvananthapuram. The symposium aims to capture the recent developments in the area of functional supramolecular chemistry. This will also provide a forum to exchange ideas, to discuss innovative and emerging results on self-assembly and supramolecular chemistry and to promote inter-discipline collaborations.

A special session will be conducted by the Royal Society of Chemistry on how to publish in high impact journals for students and early career researchers.

There is no registration fee for attending this conference and all are welcome to IISER-RSC conference!

Speakers

Prof. Sánchez, Universidad Complutense de Madrid, Spain

Prof. Fernandez, University of Munster, Germany

Prof. Kieltyka, Leiden University, The Netherlands

Prof. S. Ramakrishnan, Indian Institute of Science (IISc), Bangalore, India

Prof. K. George Thomas, Indian Institute of Science Education and Research (IISER), Thiruvananthapuram, India

Mr. Ershad Abubacker, Royal Society of Chemistry, UK

Venue

IISER Thiruvananthapuram, Seminar Room, Chemical Science Block, Room No.: 3202

Organized by

Royal Society of Chemistry (RSC)

IISER Thiruvananthapuram
